

REMARKS

Concurrently, Applicant is submitting a new set of formal drawings with a Notice to File Corrected Application Papers. These replacement drawings delete Fig. 6 which is a duplicate of Fig. 6A. Attached is a copy of each of amended Figs. 4, 5 and 7. Figs. 4 and 5 have been amended to remove illegible text. Fig. 7 has been amended to reposition the stop 66 at the rear of the housing portion 42. Fig. 7 is an exploded view and the stop 66 was originally shown in the retracted position of the housing portion 42 while the housing portion 42 is shown outside the housing 30 of the hub 29.

Applicant amended the specification to reflect the correction of the drawing duplication error and to correct several typographical errors. No new matter is added by these amendments.

None of the prior art cited in the parent case of this division application shows or suggests a portable device with pop-out outlets as defined by Applicant's claims. Accordingly, an early Notice of Allowance is respectfully requested.
